

## King Air 200 Commuter

This highly versatile charter aircraft is capable of operating from short airstrips with heavy loads over long distances. Powered by jet engines that turn propellers, this reliable and fast aircraft is capable of obtaining high altitudes in pressurized comfort. Our King Air is equipped with many safety features including all weather instrument capability, weather radar, Satellite Global Positioning System (GPS), Ground Proximity Warning System (GPWS), Radar Altimeter (RA), and Traffic Collision Avoidance System (TCAS).
